BONUS BASMATI
Baltic Sea Maritime Spatial Planning
for Sustainable Ecosystem Services

- <https://youtu.be/iMdjPnnvAq0>

What is Baltic Explorer?

- Spatial decision support system for Maritime spatial planning
 - Using maps and mapping tools to support planning
- Designed to help you collaborate and interact
- Baltic Explorer is a research prototype
 - Tested for the first time here with you

Baltic Explorer key features

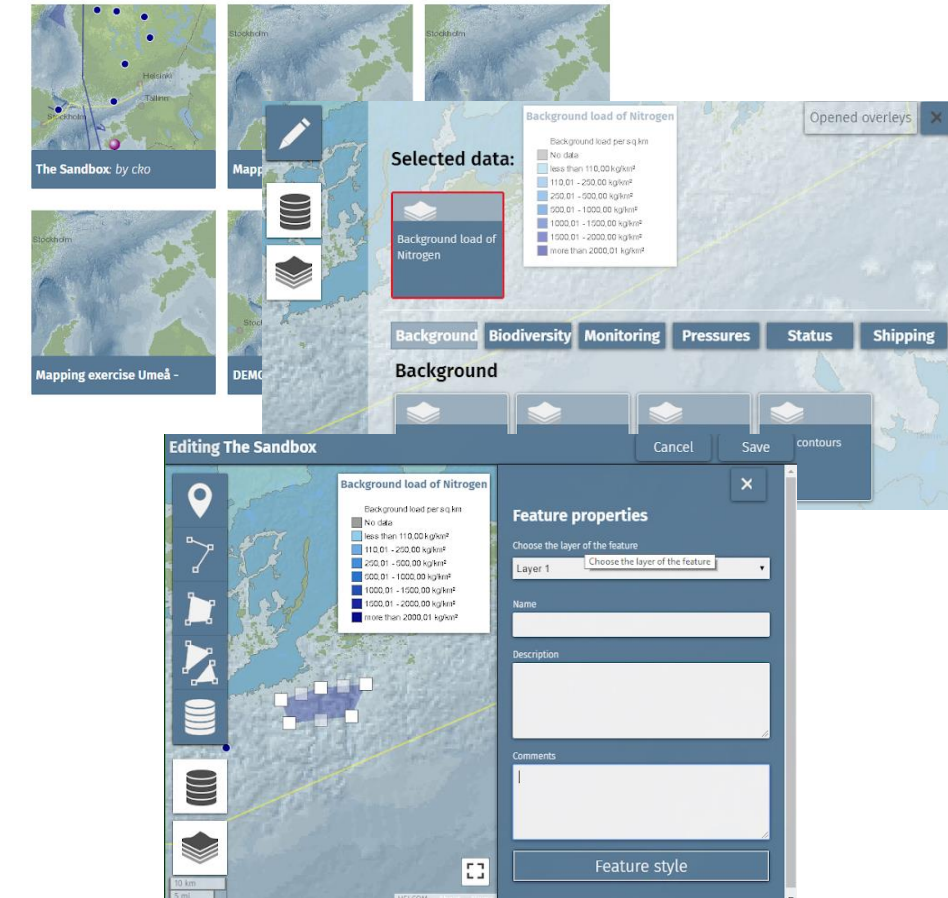

Now

- Web based (i.e. works on multiple different devices)
- Workspaces can be used by multiple users simultaneously
- View overlay data from e.g. HELCOM, Hav och Vatten, ...
- Import your own overlay data
- Draw, edit and import features in collaboration
- Open Source and free

Next

- Advanced user management, feature comments, polls & voting, analysis, ...

EXPLORER WORKSPACES

Baltic Explorer Demo

BONUS BASMATI
Baltic Sea Maritime Spatial Planning
for Sustainable Ecosystem Services

1. Login
2. Access a workspace
3. Overlay data
4. Create a personal layer
5. Add and edit features
6. Synchronize workspace

Visit balticexplorer.eu right now!

During fika you can try **Baltic Explorer**
with us and ask questions!
